

REMARKS

The specification has been amended to include a priority claim in view of the parent application.

The amendments to the claims reduce the number of, and remove multiple dependency of, the claims. The amendments to the claims and the new claim find support in the specification and claims as originally filed. Support for the new claim may be found, for example, at page 6, lines 10-27, and elsewhere in the specification as originally filed.

No new matter is added by way of the amendments to the specification or by way of the claim amendments or new claim.

CONCLUSION

Applicants believe that all claims are directed to allowable subject matter, and request consideration and allowance of all pending claims.
